Nye RSW Swing Ripper:

Nye has a wealth of experience with custom Rippers of all types for all applications. We specialize in heavy duty rippers that weigh more and rip better than standard duty rippers due to the increased down force provided by the extra weight. Our virtually unbreakable Rippers are available in two shank lengths, long and short and various tooth configurations to suit the customers' needs and preferences.
Nye rippers are built with extra heavy solid steel frames for increased down force. Nye's extremely tough frost rippers are available for all machine makes and models.
Mechanical rippers are easy to install, safe, silent to operate and available in Quick Coupler and Pin Grabber compatible versions.
