Memo Re: Bucket Lifting Loops

May 7, 2001

Standard Nye bucket loops are provided as a customer convenience and are not rated for any particular load. They are designed for lifting the bucket and for securing the machine or bucket on a float during transport. Nye lifting loops are made of 44W or QT100 steel plate.

Optional "load rated" Gunnebo lifting hooks with spring latches are available at extra cost. These weld-on hooks are rated at 10t, 14t and have a 5:1 safety factor. Gunnebo hooks can be specified at the time you order your bucket or can be installed on existing buckets in the field.

Contact our office for price and availability.
