CP4 Pulverizer

Power Action Geometry - Optimized geometry for maximum force.

Optional Ripper Shank - Four position ripper with replaceable tip*.

Nose Plates - Extra thick AR400.

Pinch Plate - For pulling wires and re-bar.

Replaceable Teeth - AR500 alloy.

Main Pivot - Large eye radius virtually indestructible.

Side Plates - Solid QT100 alloy steel plate eliminates troublesome joints and welds.

Wear Edge - Replaceable through hardened alloy blade for scraping.

Bracket - Heavy-Duty three position bracket with oversize pins.

Brace - Solid 44W, virtually indestructible.

Pivot Group - Thru hardened alloy pins and heavy wall alloy bearings.

Torque Tubes - Upgraded heavy wall tubes eliminate twisting and flex.

Features & Benefits

- Massive torque tubes absorb twisting forces.
- No extra hydraulics required, use existing bucket cylinder for power.
- Simple, safe and almost silent operation
- Replaceable wear parts.
- Optional four position ripper shank for picking, prying, lifting and flipping heavy slabs*.

Nye CP4 Concrete Pulverizer:

These mechanical pulverizer's outperform hydraulic units in both primary and secondary crushing operations.

Biomimetic crushing jaws modeled after bone crushing wolves teeth, including canine fangs for grasping and puncturing material whilst protecting the nose-plate from wear.

Built entirely from extra thick quenched and tempered alloy plate.

The alloy teeth are welded in place, not pinned, so they cannot fall out and jam your crusher,

Concrete Pulverizer's are easy to install, safe, silent to operate and available in Quick Coupler and Pin Grabber compatible versions.
