EXT Engine Puller

Mounting Eyes - Replaceable bolt-on mounting group, easy to change and suit different machines.

Machined parts - Heat treated alloy pins and super hard aluminum bronze bushings throughout.

Armor Plating - Heavy steel plating protects internals from damage. Easy access maintenance hatches.

Dual Hydraulic Cylinders - Two heavy duty, cylinders for double the cutting/ gripping force.

Fabricated Box Section - Super strong yet light weight QT100 steel.

Heavy Duty Rotator - 360 degree continuous rotation, fully guarded.

Oversized Pivot Pin - Massive main pivot pin made from 4140 heat treated centerless ground alloy steel.

Integrated Shear Blades - For cutting ferrous/non ferrous materials with ease. Easily replaceable.

Moving Jaw - Made from solid QT100 steel.

Precision Picking - Tips intersect for precision picking/ pulling.

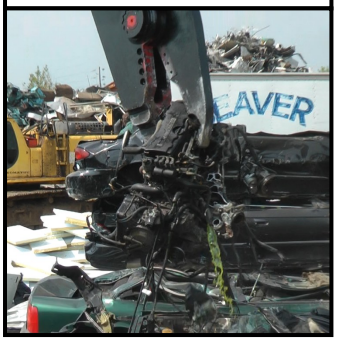

Features & Benefits

- Works well with or without a pin grabber coupler.
- Replaceable shear blades for cutting ferrous/non-ferrous materials.
- Dual heavy duty cylinders.
- Continuous 360 degree hydraulic rotation.
- Precision Picking with intersecting tips.
- Super strong grip and twist action.

All Nye products are warranted to be free of defects in materials and workmanship for a period of 2 years or 2,000 hours.
Specifications subject to change.

nye.ca/terms

Engine Puller, Auto Stripper/Sorter:

Excavator mounted, continuous rotation, engine puller, auto stripper/sorter designed to be used in the most severe auto wrecking/metal recycling/ applications.

The hydraulic rotator allows the operator to choose from any position, to grip, flip, rotate or pull. This translates to increased productivity.

Lower section is fabricated from a QT100 box, this provides strength and keeps the overall attachment weight down.

Tips mesh point to point for excellent fine picking and sorting.

Nye engine pullers are easy to install, safe and silent to operate and work with or without a Pin Grabber.
