

Mounting Eyes -

Extra thick plates resist twisting and deformation. Direct mount or Pin-Grabber compatible options.

Mounting Pins -

Super Strong, heat treated alloy steel.

Welded Box-Section Construction -

Heavy-duty QT100 top, bottom and side plates.

Cylinder - High pressure bucket cylinder to power through tough jobs.

Easy Installation - Pins onto the end of your stick and uses the existing bucket cylinder.

Tapered Body-Box-section is tapered properly for optimum weight and balance.

Internal Baffles - Proper internals for reduced twisting and deflection yields long life.

Pin and Linkage Group - Heavy-duty pins, bushings and links. Compatible with your existing attachments.

Features & Benefits

- Quickly and easily add length to your existing machine.
- Pins on in place of standard attachment.
- Optional Pin-Grabber mounting.
- Available with or without High Pressure cylinder and linkages.

All Nye products are warranted to be free of defects in materials and workmanship for a period of 2 years or 2,000 hours. Specifications subject to change.

nye.ca/terms

Nye Excavator Jib:

Nye builds custom heavy-duty excavator jibs for a wide variety dredging, demolition and high-reach applications.

Nye jibs pin-on in place of your bucket and increase the reach of your excavator. For most applications, Nye recommends direct pin-on mounting with increased pin centers for durability and improved digging forces. Standard center distances are offered where Pin-Grabber mounting is required.

Standard bucket linkages and cylinders are available and are usually one size class smaller than the base machine depending on jib length and application.

All Nye Jibs are built with QT100 structural steel for maximum strength and minimum weight.
