Nye Excavator Jib:

Nye heavy-duty excavator jibs pin-on in place of the bucket and increase reach for a wide variety of dredging, ditching, pond excavation, demolition, and high-reach applications.

For most applications, Nye recommends Type 1 direct pin mounting with increased pin centers for durability and improved digging forces.

Type 1— Direct Pin - with increased pin center distance. (Not Pin-Grabber compatible)

Type 2: Pin-On - with standard pin center distance. (Pin-Grabber compatible)

Type 3: Dedicated Quick Coupler – with brand specific QC receiver group.

Standard bucket linkages and cylinders are available. All Nye Jibs are built with QT100 structural steel for maximum strength and minimum weight.
