RP1 Frost Ripper

Hookup - Direct Pin-On and Quick Coupler versions.

Eyes - Solid 44W, virtually indestructible.

Top Plate - Extra heavy top plate for increased mass and ripping down force.

Side Plates - Solid QT100 alloy steel plates supports heavy duty shank.

Dual Radius - Efficient curvature for easy ripping in frozen ground.

Simple - Mechanical operation, no hydraulics or extra controls .

Pivot Group - Thru hardened alloy pins.

Ripper Shank - Long shank for deep penetration.

Tooth Angle - Optimized for ripping frost.

Replaceable Teeth - Customers choice of GET.

Features & Benefits

- Designed and built to handle severe frost and frozen ground.
- Extra heavy top plate for increased ripping down force.
- Customer's choice of tooth and wear shrouds.
- Customer's choice of shank length.
- Extremely tough and robust construction!

Proven Design

Reinforced Shank

Custom Adapter & Tooth

RP1 Series Typical Specifications

Carrier	Model	Pin to Point mm [in]	Shank Thicknes s mm [in]	Weight kg [lb]
13 - 17 t	15RP1	1,120 [44]	64 [2.5]	485 [1,070]

Nye Frost Ripper:

Nye has a wealth of experience with custom Rippers of all types for all applications. We specialize in heavy duty rippers that weigh more and rip better than standard duty rippers due to the increased down force provided by the extra weight. Our virtually unbreakable Rippers are available in custom shank lengths and various tooth configurations to suit the customers' needs and preferences. Shank length and tooth angle optimized for ripping frozen ground.

Nye rippers are built with extra heavy solid steel frames for increased down force. Nye's extremely tough frost rippers are available for all machine makes and models.

Mechanical rippers are easy to install, safe, silent to operate and available in Quick Coupler and Pin Grabber compatible versions.
