Nye Weld-On Thumb:

Standard "Weld-On" Thumbs are supplied as a single unit that welds to the bottom plate of the excavator arm. This type of thumb is the simplest to install and the most common. The tips of the tines will be coincident with the bucket teeth at the normal operating position allowing the operator to pick up small items with the thumb.

All Nye thumbs are the best quality thumbs money can buy. Our thumb kits are easily installed and provide years of dependable service. We manufacture both hydraulic and mechanical versions of this thumb.

BH2 The best there is, from the King of Heavy Duty!
