RB Ripper Bucket

Bores/Pin Locks - Precision bored mounting eyes with proper O-ring grooves & heavy-duty pin locks.

Lifting Loop - Customers choice welded closed or latched type.

Mounting Eyes - Extra thick lugging that exceeds original equipment specifications.

Utility Lugs - For lifting, turning, pulling, etc.

Side Plates - Extra thick AR400 abrasion resistant alloy.

Side Cutters - Extra thick QT100 structural alloy steel (highly crack resistant).

Body Taper - Nye buckets are tapered both ways vertically and horizontally.

Ripper teeth - Proper heavy duty ripper teeth.

Cheek Plates - Extra thick AR400 abrasion resistant alloy.

Dual Radii - Compound profile fills and dumps easy with reduced bottom wear.

Intermediate Teeth - Customers choice of intermediate teeth.

Base Edge - QT100 high impact structural alloy steel (highly crack resistant).

Bottom Plate - QT100 high impact structural alloy steel.

Wear Rails - Extra thick, AR400 corner wear rails, protects bucket corners.

Features and Specs

- Triple ripper configuration for trenching in extreme shale ripping conditions.
- High performance profile designed with extra thick material for long life under severe conditions.
- Optional narrow buckets with increased capacity*.
- Available for all QC types.
- Customers choice of G.E.T.

Flat bottom Profile

Center ripper tooth

Custom narrow bucket*

RB Series Typical Specifications

Carrier	Model	Width mm [in]	Weight kg [lb]
16 - 24 t	20RB1	914 [36]	1,021 [2,250]
22 - 28 t	25RB1	1,067 [42]	1,225 [2,700]
26 - 38 t	30RB1	1,219 [48]	1,429 [3,150]
35 - 50 t	40RB1	1,372 [54]	2,404 [5,300]
48 - 60 t	55RB1	1,524 [60]	3,900 [8,600]
59 - 90 t	70RB1	1,829 [72]	4,445 [9,800]

* - Optional

All Nye products are warranted to be free of defects in materials and workmanship for a period of 2 years or 2,000 hours.
Specifications subject to change.

nye.ca/terms

Nye Ripper Buckets:

Nye Ultra Heavy Duty (UHD) Ripper buckets are built with extra thick materials in all wear areas, specifically designed for severe hard shale conditions. Consistently outperforms “V” type buckets of all makes.

Our ripper buckets are equipped with a protruding center ripper tooth to outperform in the most extreme tear-out direct extraction tasks.

Custom narrow and small super aggressive ripping patterns with increased capacity are available to fit any excavator.

Ripper buckets are custom built to suit your needs exactly.
