60 - 80 t	70LF1	2,500 [98]	2,105 [83]	3,000 [6,614]

Loader Blade Forks:

Nye LF Loader Blade Forks were originally designed for loading large dimensional stone in quarries. The LF series feature heavy-duty, pin replaceable “blade” forks with fully tapered tips. The main frame is built to last with QT100 quenched and tempered steel plate and AR400 in critical wear areas. Heavy torque tubes tie the tines together and prevent twisting and racking of the structure. Oversize pivot pins and bushings ensure durability and long life. Direct pin-on or Quick Coupler mounting options. Custom versions are available to suit virtually any application.
