Nye Mechanical QAU:

These couplers are manually engaged by turning the clamping screw with the supplied socket wrench. Built with extra thick 120,000 psi steel throughout for the ultimate in safety and reliability. Nye mechanical QAU's have an extra thick QT100 baseplate that ties the mounting eyes together into one solid structural member. Requires no hydraulic or electrical connections. Easy to service, there are no inspection covers to remove and no springs, slider pins, linkages or roll pins to replace. Nye QAU's feature a redundant manually inserted lock bar for safety and features an alloy clamping screw made to take years of pounding. Special jump-size couplers allow mixing and matching of different size and brand machines top and bottom. Pick up existing attachments with a different brand excavator. No extra valves or hoses are required.
