SB1 Slab Bucket

Bores/Pin Locks - Precision bored mounting eyes with proper O-ring grooves.

Bridge Tube - Super heavy structural tube twisting and bending.

Tines - Extra thick QT100 structural alloy steel (highly crack resistant).

Teeth - Customers choice of teeth and wear parts.

Mounting Eyes - Extra thick 44W eye plates that exceed original equipment specifications.

Hookup - Direct Pin and Quick Coupler versions.

Serrated Tines - Extra grip for slab prying and easy load handling.

Bottom Plate - Extra thick 44W basket plate.

Base Edge - AR400 high impact abrasion resistant alloy steel (highly crack resistant).

Features and Specs

- Extreme service virtually indestructible.
- Heavier alternative to OEM buckets.
- Available for Pin-on and all Quick Coupler types.
- Custom widths, profiles and types available.
- Customers choice of G.E.T.

Low profile version

Tilt QC Version

Nye Slab Buckets:

Nye Slab Buckets are custom built for all slab removal and handling operations. Custom widths and profiles are available that match the jobsite conditions, so you get the best performing bucket available.
Inside profiles can be round or square for thick slab applications. Serrated teeth on the upper surface of the tines hold slabs in place and reduce slipping.
Nye slab buckets can be equipped with a basic clean base edge, “re-pointer bar” cutting edges or teeth of any type and configuration.
All Nye buckets exceed OEM specifications for strength and toughness. Extra thick AR400 and QT100 steel plates offer maximum strength and durability. Nye Slab buckets are designed to endure pounding and prying that would destroy most competitive brand buckets.
Available in various designs and custom patterns, Nye Slab Buckets can be built for direct pin-on mounting (using OEM bucket pins) or pin grabber compatible, or any type of dedicated quick coupler system.
Nye has a proud reputation of working closely with customers to develop new patterns specifically suited for their application. Every Nye bucket is built to order and designed to properly fit your machine.
