SKD Skid Crusher

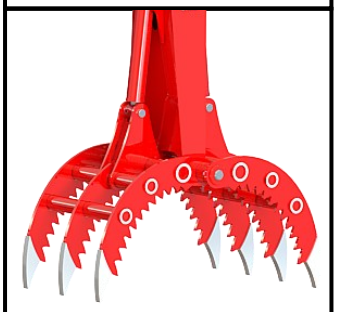

Features & Benefits

- Works well with or without a pin grabber coupler.
- Replaceable weld-on hardened tips for longer durability.
- Dual heavy duty cylinders.
- Precision Picking with intersecting tips.
- Super strong grip and crush force.

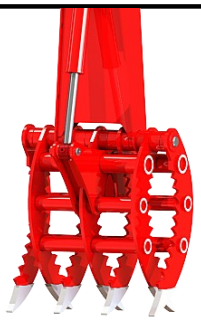

Replaceable Tips

Strong Construction

Full Intersecting Tines

SKD Series Typical Specifications

Carrier	Model	Tip Radius mm [in]	Weight kg [lb]
16 - 24 t	SKD200	885 [35]	1,497 [3,300]
22 - 28 t	SKD250	965 [38]	1,746 [3,850]
26 - 38 t	SKD350	1,067 [42]	1,905 [4,200]

Skid Crusher, Stripper/Sorter:

SKD crusher grapples feature a serrated structural tine design. The solid AR400 tines extend all the way from the tips to the hinge group forming super strong structure and are designed to provide extreme wear and impact resistance. Triple heavy-duty torque tubes resolve bending and twisting forces.
The tines are profiled with biomimetic teeth that effectively smash skids and debris into splinters. Extra thick AR400 tips are easy to welded-on and replace when needed.
Heavy-duty, long stroke cylinders provide smooth independent tine motion and extreme crushing forces.
Optional cylinder rod guards are available.
Pin-on, Quick Coupler, Pin-Grabber and free-swinging versions are available. No weld-on stick bracket is required.
