Nye LS1 Loader Scoop Bucket:

Loader mounted front scoop bucket.
The Nye scoop bucket makes it easy to transfer back fill material from the stock pile to an excavator bucket.
The excavator can then distribute the material in the trench as required.
The Nye scoop bucket outperforms and eliminates the need for a side dump bucket for backfilling.
Flat bottom design reduces stockpile waste (easier cleanup)
Nye scoop buckets are available in a variety of width and capacity configurations.
Direct pin-on and QC versions available.
