SDB Side Dump Bucket

Gravity Lock Mechanism - Mechanical Lock prevents the bucket from moving when the cylinder is not engaged.

Hydraulic Control Valve - Multi-function control valve provides load holding / relieving, speed control, and hose management functions.

HD Hydraulic Cylinder - Dual-cushioned fully protected dump cylinder provides easy controlled lateral dumping.

Easy dumping - 45-degree angle allows full side dumping and precision material placement.

Mounting Eyes - Heavy duty mounting available for pin-on and Quick Coupler configurations.

Pivot Group - Heavy duty Hinge Eyes with heavy walled bushings ensure durability and dependability.

Cutting Edge - Base Edge drilled to accept teeth or Bolt-on edges.

Features & Benefits

- Standard left-hand dump; Optional right-hand available.
- Pin On or Quick Coupler versions available.
- Cushioned hydraulic cylinder with multi-function control valve.
- Standard mechanical gravity lock mechanism.
- Heavy duty boxed back frame provides superior strength and durability.

Easy side unload

Protected Hydraulics

Mechanical Gravity Latch

SDB Series General Specifications

Carrier	Model	Width mm [in]	Height mm [in]
16 - 24 t	SDB150	3048 [120]	1230 [48]
22 - 28 t	SDB300	3048 [120]	1500 [59]
26 - 38 t	SDB350	3404 [134]	1700 [67]

Side Dump Bucket:

Nye SDB Side Dump Bucket double as a conventional or lateral dumping bucket and is designed to outperform in hard to maneuver work sites. The main boxed frame is built to last with QT100 quenched and tempered steel plate and AR500 in critical wear areas. Heavy torque plates and heavy walled bushings tie the pivot together and prevent twisting and racking of the structure. Oversize pivot pins and bushings ensure durability and long life. The single high-pressure cylinder with casing guard allows for optimum bucket positioning and controlled dumping under all working conditions. Direct pin-on or Quick Coupler versions are available to suit virtually any machine. Bucket base edge can be equipped with weld-on repointer, bolt-on segments or teeth.
Over-the-bucket forks are also available.
