SRE Skeleton Buckets

Lifting Loop - Customers choice welded closed or latched type.

Bores/Pin locks - Precision bored mounting eyes to accept OEM pins.

Body Taper - Nye Buckets are tapered both ways, horizontally and vertically.

Cheek Plates - AR400 abrasion resistant alloy wear plate.

Wear Rails - Extra thick AR400, corner wear rails, protects bucket corners.

Profiled Ribs & cross bars - Customizable openings to suit your application requirements.

Teeth - Customers' choice of teeth and wear parts.

Base Edge - AR400 OR QT100 high impact structural alloy steel (highly crack resistant).

Side Cutters - Extra thick AR400 OR QT100 structural alloy steel (highly crack resistant).

Side Plates - Extra thick 44W OR QT100 alloy side plates.

Utility Lugs - For lifting, turning, pulling, etc.

Mounting Eyes - Extra thick 44W eye plates that exceed original equipment specifications.

Features and Specs

- Profiled ribs and cross bars with ~100-175 openings customizable to suit your application requirements.
- AR400 steel plate construction for superior durability.
- Pin-on or Quick Coupler versions.
- Custom widths, profiles and configurations available.
- Customers choice of G.E.T.

Skeleton Bucket:

Nye Skeleton Buckets are engineered using abrasion resistant and high strength materials to withstand the most severe service.
Design types are available with perforated baskets or interlocked ribs and cross bars that meet the most demanding custom material separation applications.
Both designs do not contain any moving parts and exceed OEM specs.
Tapered vertically and horizontally along with a dual compounded radii profile, SRE buckets allow for easy filling and dumping effectively reducing bottom wear.

Skeleton Buckets are available in various sizes, widths, and custom rib spacing configurations along with customers' choice of ground engaging tools.
