

# NYE® PT1 Progressive Link Thumb

**Power action geometry** - Does not interfere with factory pins and linkages.

**Solid Frame** - Solid QT100 alloy side plates eliminate unwanted deflection.

**Curved profile** - Cradles material for maximum capacity.

**Serrated Edges** - For maximum grip and control.

**Cylinder** - Extra strong cushioned hydraulic cylinder.

**Pivot group** - Alloy bushings and thru Hardened alloy pins.

**Base Edge** - Extra thick AR400.

**Biomimetic Fangs** - Weld-on AR400 replaceable teeth.

## Features & Benefits

- Easy installation, one piece baseplate welds to underside of arm.
- Biomimetic fangs custom designed to fit the bucket teeth.
- Quenched & tempered and Abrasion Resistant alloy steel used throughout.
- No bucket or boom interference.
- Super heavy construction.

## Heavy-Duty Hydraulics

## Weld-on fangs

## Unitized baseplate

## PT1 Series Typical Specifications

Carrier	Model	Width mm [in]	Length mm [in]
16 - 24 t	20PT1	N/A	N/A
22 - 28 t	30PT1	Configurable	1710 [67]
26 - 38 t	40PT1	Configurable	1800 [71]
35 - 50 t	45PT1	N/A	N/A

## Progressive Link Thumb:

Nye PT1 Progressive Link (pro-link) weld-on thumbs feature a unique single unit design, manufactured for quick and easy installation. Heavy-duty biomimetic teeth, with serrations for extra grip, are welded solid to the base edge. The teeth mesh perfectly with your bucket because all Nye thumbs are custom built to suit your existing bucket and tooth arrangement. The fully independent thumb linkage group is engineered to achieve 160° rotation. A simplified one-piece baseplate design means installation does not require disassembling or altering the factory pins or linkages. Nye PT1 series pro-link thumbs are strong and versatile, built with quenched and tempered alloy steel to provide years of dependable service in the most demanding forestry and demolition applications. Every Nye thumb is built to order so you get exactly the equipment you need - custom configurations are available to suit any application.
