Progressive Link Thumb:

Nye PT1 Progressive Link (pro-link) weld-on thumbs feature a unique single unit design, manufactured for quick and easy installation. Heavy-duty biomimetic teeth, with serrations for extra grip, are welded solid to the base edge. The teeth mesh perfectly with your bucket because all Nye thumbs are custom built to suit your existing bucket and tooth arrangement.
The fully independent thumb linkage group is engineered to achieve 160° rotation. A simplified one-piece baseplate design means installation does not require disassembling or altering the factory pins or linkages.
Nye PT1 series pro-link thumbs are strong and versatile, built with quenched and tempered alloy steel to provide years of dependable service in the most demanding forestry and demolition applications.
Every Nye thumb is built to order so you get exactly the equipment you need - custom configurations are available to suit any application.
