

RHG Rotating Log Grapple

Est. 1952
70
YEARS

Pins - Super strong, heat treated alloy steel.

Mounting Eyes - Extra thick plates resist twisting and deformation.

Heavy duty Rotator - 360 degree continuous rotation.

High-pressure cylinders - Two protected heavy-duty hydraulic cylinders for extra gripping force.

Hydraulic Synchronization - Fully hydraulic divider/combiner tine synchronization.

Tubes - Heavy wall torque tubes eliminate twisting and flex.

Pivot group - Alloy bushings and thru hardened alloy pins.

Lower Fangs - Tips intersect for precision picking/pulling.

Features & Benefits

- Heavy wall tubes absorb twisting forces.
- Wide clamping range handles large loads.
- Quenched & tempered and Abrasion Resistant alloy steel used throughout.
- Hydraulic synchronization eliminates troublesome linkages and bell cranks.
- Oversize pins and bushings for durability and long life.

RHG Series Typical Specifications

Carrier	Model	Opening mm [in]	Width mm [in]	Height mm [in]
16 - 24 t	RHG200	N/A	N/A	N/A
22 - 28 t	RHG250	1,295 [51]	1,081 [43]	2,480 [59]
26 - 38 t	RHG350	2,095 [82]	1,074 [67]	1,850 [73]
35 - 50 t	RHG450	N/A	N/A	N/A

Rotating Log Grapple:

Nye RHG rotating hydraulic log grapples are designed for production log loading under severe working conditions. The RHG series feature a super tough body structure with over-size pins & bushings that can take extreme pounding and prying. The wide tine openings allow easy, high-speed loading and placing of heavy logs. Heavy-wall tubes tie the jaws together to prevent twisting and racking of the structure. Guarded high-pressure hydraulic cylinders provide ample clamping force under all working conditions. Full hydraulic tine-synchronization means no troublesome linkages or bell-cranks, the virtually indestructible divider/combiner valve keeps both tines in sync at all times. Our heavy-duty rotators feature 3600 continuous rotation with oversized bearings and drive motors. All RHG grapples are custom built to suit your excavator. Direct pin-on or Quick Coupler versions are available to suit virtually any heavy-duty logging application.
