

**Pivot Group** - Thru hardened alloy pins and heavy wall alloy bearings.

**Side Plates** - Extra thick QT100 Alloy Steel.

**Serrated edges** - for grip and control.

**Curved Profile** - Curved profile cradles material for maximum capacity.

**Nose Plates** - Extra thick AR400.

**Intersecting Tips** - For fine picking and placing.

**Cylinder** - Extra strong hydraulic cylinder, optional high pressure cylinder available.

**Brace Mount** - Oversize pin to receive high pressure cylinder or rigid brace.

**Full-Length Tines** - From pin point, AR400.

**Baffles** - Heavy plates reduce twisting forces.

**Replaceable Teeth (optional)** - Shown with replaceable teeth.

## Features & Benefits

- AR400 cutting edge.
- Optional Weld-on or pin-on replaceable teeth.
- Quickly retracts out of the way.
- Adjusts to any angle.
- A Pin-On style thumb that works with a quick coupler and stays with the bucket.
- Excellent for loading demolition debris, wood waste, armor stone, etc.

## Heavy Duty

## Many Configurations

## Stays With Bucket

## BT1 Series Typical Specifications

Carrier	Model	Tip Radius mm [in]	Weight kg [lb]
13 - 17 t	2BT1	1,533 [60]	4,950 [2,250]
16 - 24 t	3BT1	1,594 [63]	6,556 [2,980]
22 - 28 t	4BT1	1,801 [71]	9,944 [4,520]
26 - 38 t	5BT1	1,960 [77]	12,012 [5,460]

## Nye Integral Thumb:

Nye Integral Thumbs are hinged directly on the bucket so they come off clean when the bucket is uncoupled.

Excellent for loading: demolition debris, wood waste, armor stone, etc. Designed to work with most quick couplers, the Integral Thumb stays with the bucket at all times. This allows other attachments to be coupled without interference from the thumb. The Integral Thumb cylinder and bracket can be used with some other attachments like Grapples or Stump Harvesters.

Consult our engineering department to determine compatibility with your existing equipment.
