Nye CBT Tilt Chuck Blade:

The Nye CBT Tilt Chuck Blade features super strong QT100 front and rear beams.

The Heavy-duty double acting cylinders are strategically mounted low on the back, over a sloped bridge plate, which promotes self clearing of mud, stones and debris.

Heavy duty bolt-on edges are standard. The hydraulic control valve provides load holding/relieving, speed control, side hose hookup and hose management functions.

All Nye CBTs have a full 90° tilt range, 45° left and 45° right, with high holding power.

Built for outstanding strength, serviceability and long life. Nye CBTs are available in quick coupler and direct-pin versions.
