[nye.ca/terms](http://nye.ca/terms)

Nye has likely built more custom rippers for different machines than any other attachment manufacturer. Our virtually unbreakable rippers are available with various shank lengths and tooth configurations. Our patented Swing-Tooth™ ripper is excellent for trenching in shale and frozen ground, the shank is self-locking and requires no hydraulics. The MOAR™ is a new weighted ripper concept designed to increase penetration. Customer's choice of teeth and optional wear shrouds.
