

Main Shank - Extra thick QT100 Alloy Steel.

PATENTED

Mounting Bracket - Replaceable Bolt-on mounting bracket dedicated to your machine.

Features & Benefits

- Bolted top mount - no stick bracket required.
- Compatible with existing thumbs.
- Dual high-pressure cylinders - ultra high shear force.
- Extra wide jaw opening for large stumps.
- Proven SHX geometry, with solid CNC profiled blade and teeth.

Extra Wide Opening

Dual Cylinders

Proven Geometry

Splitter Fang - Optimal geometry for efficient splitting with and across the grain. Solid CNC machined AR400.

Cutting Blade - CNC machined, from AR500. Solid unbreakable cutting edge.

Dual Anvil - AR400 hardened Alloy Steel. Virtually unbreakable.

Digging Teeth - Weld-on AR400 teeth for ripping, prying and digging.

Flat Edge - Sits on the ground flat to provide easy connection without damaging asphalt.

Dual Cylinders - Dual high pressure cylinders provide ultra high shear force.

Side Plates - Extra thick QT100 Alloy Steel. Serrated edges for grip and control.

TSX Series Typical Specifications

Carrier Class	Model	Opening mm [in]	Fang Force (t)	Weight kg [lb]
130 - 290	TSX200	1,090 [43]	19.6	1,540 [3,400]
200 - 400	TSX300	1,295 [51]	28.6	2,335 [5,150]
350 - 500	TSX450	1,560 [61]	40.5	3,495 [7,700]

TSX "Terminator" Stump Harvester:

Featuring the heavy-duty blade, fang, and anvil geometry taken from our proven SHX design.

The TSX gives high performance combined with self-contained mounting that does not interfere with thumbs and other stick mounted equipment.

The AR400 piercing tip and grubbing teeth are virtually indestructible, easily trashing the most stubborn oak and hard maple stumps. All teeth are welded-in, so they can't fall out and damage grinders and other downstream equipment.

The blade uses the same CNC sculpted AR500 convex edge used on our SHX Harvesters. You get the same heavy-duty blade technology, in an ultra powerful, twin cylinder hydraulic harvester.

Dual AR400 anvil plates provide an impacted striking surface for the blade, making quick work of processing and cross-cutting brush, logs, and roots.
